The CAI is honored to be AMVETS lead dL Contractor in this important program. (On-Going)

Mgs04 Corporation

The CAI provided all services and expertise required to register Mgs04 with the United States Federal Government positioning it to sell its products through contract and purchase. This included a business strategy and all associated planning to position the company to enter the Army, Navy, Air Force, Marine Corps and U.S. Coast Guard Exchange services. Future efforts will include market-penetration into

State College and University programs. The result will be to significantly expand the Company's customer base. Services provided include the strategic plan; a detailed phased approach; and providing direct support in achieving implementation goals. (On-Going)

GovSec

The CAI developed and delivered training workshops on Decision-making under stress and in crisis situations for GovSec 2012 and 2013 events. Participants underwent human factors analysis and training to provide knowledge, skills, and abilities to function in conditions where stress changes individual working styles and cognitive processes, resulting in significant effects on performance and situational awareness. Students learned the effects stress has on individuals and groups including problem solving and decision-making, communications, situational awareness development and sharing, and conflict management; individual working styles; and what styles are most flexible or most susceptible to adverse effects of stress.

Science Applications International Corporation

Provided expert consultation for SAIC working as a member of the U.S. Army Corps of Engineer (USACE) Director of Contingency Operations and G-3 Operations to establish strategic plans and objectives related to the future policies, missions, and direction of the Trans Atlantic Division (TAD). The effort will set up and coordinate (lead) the new Tiger Team examining the future TAD missions. (Completed, 2012)
